Your staff are important, keep them safe

Who is Little Green Button for?

Little Green Button is ideal for all organisations where staff face the public or carry out consultations or interviews. It's particularly useful for any situation where aggressive or threatening behaviour may be a concern. It's perfect for businesses, government organisations, the healthcare sector and educational establishments.

How does it work?

The Little Green Button is a small icon that sits on your PC desktop. If you feel under threat, require urgent assistance or there is a medical emergency, simply double click on the Little Green Button to request help from your colleagues. An alert pops up on every PC on the network. Whoever's closest can respond – their presence can help prevent a situation from escalating.

Simply put, Little Green Button gives your staff the peace of mind that comes from knowing they can call for company at any time.

Why choose Little Green Button?

- ✓ **It works** – a rapid response prevents the escalation of an incident
- ✓ **Easy to install** – simply download the software from our website
- ✓ **Easy to use** – the button floats above all running programs so it can be accessed quickly
- ✓ **Subtle** – the alarm can be raised without the assailant knowing
- ✓ **Cheap** – because it uses your existing computers and networks, the cost is low
- ✓ **Always available** – from the moment you log on to your PC; it even works if your internet connection is lost
- ✓ **Flexible** – if you prefer to use a physical panic button to trigger the alarm, no problem
- ✓ **Support available** – access to our support team is included in the licence fee.
